

Ice Cream Stories

The following three images and text are each held within `div` block that the class attributes `p-4 mb-4 bg-light rounded`, to set the padding, margin-below, background colour and corner shape, respectively. Each Image & Text holds a `row`, with the image assigned to a `col-sm-4` column and the text assigned to a single `col-sm-8`; allowing it to span the remaining 8 column units. Added to each of these two columns is the `col-12`, which says when the screen is smaller than 576px, it will then use all 12 columns grids for each image and text, allowing them to be stacked on top of each other.

Ice Creams at the Beach by Tim Stief

Here, the class `img-fluid rounded` has been applied to the image. The title above uses `<p class="lead">` to make the text stand out. While this text uses the `<p class="small">` to distinguish it from the normal paragraphs.

Ice Creams in a Carpark by Valerian Koo

Another picture of a beautiful butterfly that has the class `img-fluid rounded-pill` applied to it.

Ice Creams in Winter by Phillip Cordts

Here, the class `img-fluid rounded-circle` has been applied to the image.

Summary

This then concludes the content in the main section of the page. Note that the end of each content block is a hyperlink back to the [Top](#) of the page. It uses the `<p class="text-end">` to align to the right of the screen.

The next and final section is the footer which uses `div` styled with the class `container-fluid p-2 bg-dark text-white` to align the paragraph text in centre of the container.
